HIGH PRESSURE IN RESEARCH AND INDUSTRY

8th AIRAPT Conference
19th EHPRG Conference

17–22 August 1981
Institute of Physical Chemistry
University of Uppsala
Sweden

University Building, Uppsala
Conference site

Proceedings

Editors:

C.-M. Backman, T. Johannisson and
L. Tegnér

Volume 1

Contents	i
Preface	xiii
Acknowledgement	xv
Opening Address, Mr Jan-Erik Wikström, Minister of Education and Cultural Affairs	1
P.W. Bridgman Award Address, 1981, Prof. E. U. Franck	4
The condensed matter transformation under the shock-wave. Induced compression at different extent of approach to the isoentropic conditions, G.A. Adadurov, V.I. Gol'danskii	18
Developments in the understanding and application of explosive welding, B. Crossland	33
Organic chemical synthesis at high pressure, W. G. Dauben	43
From powder to superstrength material via high pressure, K. E. Easterling	49
Man, marine animals and membranes, A. G. Macdonald	55
Volume profiles of chemical reactions, W. J. le Noble, C. S. Springer	62
High pressure phases in the metal-hydrogen system, E.G. Ponyatovsky, V.E. Antonov, I.T. Belash	80
New dimensions in the study of phonon thermal conductivity through the use of high pressure, R. G. Ross	95
Pressures of 2 megabars with the diamond anvil-indentor, A. L. Ruoff	108
Effects of pressure on water and aqueous solutions (solute- solute-solvent interactions relating to biological systems), K. Suzuki	122
Panel report 1: Panel on high pressure safety; G. J. Mraz	135
Contribution to reports on high pressure safety and design codes in various countries; J. Liljeblad	140
Panel report 2: Toward an international practical pressure scale: An AIRAPT Task Group Report; V.E. Bean, S. Akimoto, P.M. Bell, S. Block, W.B. Holzapfel, J.C. Jamieson, M.H. Manghnani, M.F. Nicol, G.J. Piermarini, S.M. Stishov	144

Dynamic high pressure

A rail gun combined with double stage light gas gun designed for ultra high shock pressure experiment, A. Sawaoka, S. Usuba, K. Kondo	152
Shock compression measurements at pressures greater than 1 TPa, C. E. Ragan	156
Properties of matter at ultra-high pressures, F. C. Perry, M. A. Sweeney, J. R. Asay	160
Laser-generated shock wave experiments at Lawrence Livermore National Laboratory, N. C. Holmes, R. J. Trainor, R. A. Anderson, Y. T. Lee, D. L. Banner, E. M. Campbell, R. J. Harrach, W. C. Mead, R. J. Olness, D. W. Phillion, M. D. Rosen, F. Ze, R. E. Turner	164
Formation and decay of laser generated shock waves, F. Cottet, J. P. Romain	168
Impedance-match experiments using high-pressure, laser-driven shock waves, L. Veaser, N. Holmes, R. Trainor, G. Reeves, R. Anderson	171
Experimental Hugoniot of copper in the shock pressure range 40 GPa - 150 GPa, H. Bernier, M. Valadon, M. Zembri, JM Lezaud	175
Kinetics of shock-induced phase transition of Zirkon in several 10s GPa region, T. Mashimo, K. Nagayama	179
Time-resolved wave profile measurements in copper to megabar pressures, L. C. Chhabildas, J. R. Asay	183
Laser differential mixing method for measuring velocity, Jin Xiao-Gang, Yu Zheng, Tan Zhen-Nan, Hu Shao-Lou, Wang Wen-Lin	190
Experimental Hugoniot of lead in the pressure range 20 GPa - 80 GPa. Melting along the Hugoniot, H. Bernier, P. Lalle	194
Relaxation effects in shock-induced transitions in Bismuth, T. R. Neal	198
Electromagnetic precursor in shock loaded polymers, M. Germain-Lacour, M. de Gliniasty	202
Shock- compressed liquids, W. J. Nellis, M. Ross, F. H. Ree, A. C. Mitchell, M. van Thiel	211
Theoretical calculation of equations of state and melting curves of Hydrogen and Helium at high pressures, D. A. Young, M. Ross, A. K. McMahan	213
Evidence for metallic phases of strong covalent materials in shock compression data, R. Grover, F. H. Ree	217
Interpretation of shock-wave data for Beryllium and Uranium with an elastic-viscoplastic constitutive model, D. J. Steinberg, R. W. Sharp, Jr.	223
Viscoplastic response of Beryllium under shock compression, J. R. Asay, L. C. Chhabildas, J. L. Wise	227

Pressure-shear loading of materials, L. C. Chhabildas, J. W. Swegle	231
Impulsive fracture and fragmentation of solids D. E. Grady	235
Axial-different Hugoniot and electrical conductivities under shock compression of Rutile phase TiO_2 , T. Mashimo, K. Nagayama, A. Sawaoka	239
Spectroscopy	
The pressure and temperature dependence of Raman spectrum of some molecular crystals, A. Jayaraman, T. Chattopadhyay, H. G. v. Schnering, C. Carlone	243
New phase of ortho Deuterium at ultra high pressure and frequency dependence of the $Q_1(0)$ vibron, R. J. Wijngaarden, I. F. Silvera, D. Brandt	255
Brillouin scattering from amorphous SiO_2 under hydrostatic pressure up to 133 kbar, J. Schroeder, K.-J. Dunn, F. P. Bundy	259
Brillouin scattering in GaS under high pressure, A. Pollian, J. M. Besson, M. Grimsditch, H. Vogt	268
Observation of molecular dissociation of Iodine at high- pressure by Raman scattering study, O. Shimomura, K. Takemura, K. Aoki	272
Study of vibrational energy relaxation of $n\text{-H}_2$ gas in a large range of density and temperature, M. Chatelet, B. Oksengorn	275
Studies in Chemical Physics through high pressure luminescence, H. G. Drickamer	278
Benzenic molecules in paraffins: Solution structure, pressure effects, A. Ciais	285
Pressure dependence to 100 kbar of the MgO phonons at 90 and 295 K, A. Chopelas, M. Nicol	290
A NMR investigation of solid CH_4 at pressures up to 10 kbar, D. van der Putten, K. O. Prins, N. J. Trappeniers	294
High pressure spin-lattice-relaxation time studies in supercooled H_2O and D_2O enriched with O-17 , E. Lang, H.-D. Lüdemann	298
Nuclear quadrupole interaction study of high-pressure phase transitions in In-Bi intermetallic compounds, S. G. Fries, J. A. H. da Jornada, R. P. Livi, A. Maciel E. R. Fraga	302
Phase diagrams, phase transitions, metal-nonmetal transitions	
Pressure and the study of quantum effects at structural phase transitions, G. A. Samara	305
High pressure studies of PbI_2 and some AB_2 compounds, P. W. Richter, J. B. Clark, W. Klement Jr.	312

New approximate thermodynamic functions of anharmonic oscillator solids, Zhang Wan-Xiang	317
Pressure-induced metallic transitions in Mercury Chalcogenides, A. Onodera, A. Ohtani, M. Motobayashi, T. Seike, O. Shimomura, O. Fukunaga	321
Pressure induced semiconductor-metal transitions in $Tm_{1-x}Eu_xSe$ H. Boppart, P. Wachter	327
High pressure thermal stability of GaN, J. Karpiński, S. Majorowski	331
General regularities of the intermediate phases formation in the alloys of B-metals at high pressures, V. E. Degtyareva, E. C. Ponyatovsky	335
Measurement of the PVT properties of SF_6 in the critical region, S. N. Biswas, N. J. Trappeniers, J. H. B. Hoogland	344
Volume change on melting of some salts, J. P. Petitet, M. Fraiha, R. Tufeu, B. Le Neindre	350
Equation of state measurements of α , β and ω -Ti by high pressure energy dispersive X-ray diffraction, Y. K. Vohra, H. Oliynyk, W. Grosshans, W. B. Holzapfel	354
Melting curve and high pressure phases of 4He above 10 GPa, P. Loubeyre, J. P. Pinceaux, J. M. Besson	358
Diamond interaction with various metals and alloys under different environmental conditions, A. Rabinkin	361
Study of graphite-diamond transformation process by electro-thermal analysis, S. Naka, Y. Suwa, S. Hirano	365
Inclusions in synthesized single crystals of diamond, M. Wakatsuki, K. Takano, K. Inoue	369
Behavior of non-catalytic transformations in boron nitride and in carbon, A. Onodera, H. Miyazaki, Y. Matsushita, Y. Miyamae, R. Sugimori	373
Simultaneous sintering of cubic BN with conversion of hex. BN by addition of AlN under high pressure, S. Hirano, S. Hon, S. Naka	376
Pressure formation of $SmS_{1-x}O_x$, J. M. Leger, J. Loriers	380
Effect of additives on phase transformations and sintering of Wurtzite-type boron nitride at high pressures and temperatures, E. Rapoport, K. Sato, A. Sawaoka	384
Effect of hydrostatic pressure on the phase transition and small polaron parameters in $NaNbO_3$ monocrystals, M. Pisarski	388

Mechanical properties

Brittle fracture stress and brittle to ductile transition of some brittle alloys under high hydrostatic pressure and high temperature, Y. Kaieda, A. Oguchi	392
Structural features of an austenite alloy with low energy stacking faults deformed under high pressure, V. I. Zaitsev, A.A. Dobrikov, A.S. Domareva	396
Dislocation mobility in hydrostatically compressed KCl crystals, V.I. Zaitsev, V.I. Barbashov, V.A. Streltsov, Yu.B. Tkachenko	400
Evolution of dislocation structure of Aluminium and Copper during creep under high pressure, V.I. Zaitsev, O.V. Presnyakova, V.A. Fomchenko	404
Dislocalization of the plastic deformation of hydrostatically compressed single crystals at their active deformation, V.I. Zaitsev, G.Ya. Akimov, V.A. Streltsov	408
Phonon, thermal and acoustic properties	
Pressure dependence of the thermal conductivity of insulators, D. Gerlich	412
Thermal properties of Silver Halide crystals under pressure, R. G. Ross, P. Andersson	416
Thermal properties of sintered polycrystalline Diamond, P. D. Gigl	420
Differential scanning calorimetry at high pressure, J. I. Geijsel, J. A. Schouten, N. J. Trappeniers	424
Measurements of transition enthalpies at high pressure by differential scanning calorimetry (DSC), B.-E. Mellander, B. Baranowski, A. Lundén	428
Transport properties of Iron and Nickel under pressure, B. Sundqvist	432
Diffusion coefficient of Hydrogen and Deuterium in nearly stoichiometric Palladium Hydride and Deuteride, S. Majorowski, B. Baranowski	434
The elastic moduli of fluorite materials at high pressures, S. Hart, D. Gerlich	438
Elastic properties of Uranium-.78 Ti as a function of pressure to 1.6 GPa, J. Frankel	442
The elastic constants of Cadmium Fluoride at high pressure, S. Hart	446
Studies of the pressure rotation-liberation transition in solid H ₂ , I. Aviram, S. Goshen, R. Thieberger	450

Electronic structure

- Electron band theory and high pressure equation of state,
A. K. McMahan 453
- Inversion of the Γ and X conduction bands of InP under
high pressure,
T. Kobayashi, T. Tei, K. Aoki, K. Yamamoto, K. Abe
- The band structure of Germanium and its pressure coefficients
from high pressure studies of electrical transport in ultra-
pure material,
C.N. Ahmad, A.R. Adams, B.J. Sealy, R.J. Nicholas, G.D. Pitt 464
- The effect of static and modulated uniaxial constraint on
impurity band conduction in Germanium,
B.A. Lombos, M. Averous, C. Fau, J. Cala, S. Charar 468
- EXAFS studies of several binary compounds at high pressures,
J. M. Tranquada, J. E. Whitmore, E. D. Crozier, R. Ingalls 477
- High pressure photoconductivity techniques and their application
to semiconductor alloy systems,
B.J. Gunney, D. Patel, H.L. Tatham, J.R. Hayes, A.R. Adams 481
- The influence of pressure transmitting gases on the high
pressure photoconductivity of Germanium,
J. Jung, B. Pohoryles 485
- High pressure magnetophonon measurements of InSb and GaAs,
C.N. Ahmad, H.L. Tatham, A.R. Adams, R.J. Nicholas, G.D. Pitt 489
- Effect of pressure on the optical properties of Silver and
Cesium,
K. Syassen, H. Tups, A. Otto 493

Electric and magnetic properties

- Pressure dependence of the electrical resistance of $\text{Pd}_{30}\text{Zr}_{70}$
and $\text{Cu}_{40}\text{Zr}_{60}$ amorphous alloys,
J. Willer, G. Fritsch, E. Lüscher 499
- Recent results in superconductivity and magnetism under
high pressure,
J. S. Schilling 504
- Pressure quenched CdS: A high temperature superconductor?
C.G. Homan, D.P. Kendall, R.K. MacCrone 512
- The investigation of superconductivity using "rounded cone-
plane anvile" apparatus,
E.N. Yakovlev, B.N. Vinogradov, G.N. Stepanov, Yu.A. Timofeev 516

Structural studies

- Solid O_2 at high pressures: Raman spectra, electronic spectra
and phase equilibria,
M. Nicol 527
- The phase diagram of Rubidium cyanine,
E. Rehder, J. Ploner, W. Dultz 534
- Raman and X-ray investigations of Ice VII,
G. E. Walrafen, M. Abebe, F.A. Mauer, S. Block,
G.J. Piermarini, R. Munro 537

X-Ray diffraction and Raman scattering of GaS under pressure, H. Shinriki, K. Takemura, K. Asaumi, S. Minomura	540
Variable pressure and temperature system for energy dispersive analyses of diffracted Synchrotron radiation, E.F. Skelton, I.L. Spain, S.B. Qadri, C.S. Menoni	544
Crystal structure of Cs IV, K. Takemura, S. Minomura	548
Neutron scattering studies of solids under stress and pressure, C. Vettier	552
X-Ray powder diffraction on naphthalene up to 0.5 GPa, H. C. Alt	556
Anvil technology and applications	
Uniaxial stress measurements with the diamond anvil cell: Copper Halides, S. Ves, A. Blacha, M. Cardona	560
Diamond anvil high pressure systems capable of rapid spectro- scopic measurement, K. Takano, M. Wakatsuki, O. Shimomura	567
Detection of phase transitions in molecular solids with a diamond anvil cell, H. Wieldraaijer, J. A. Schouten, N. J. Trappeniers	571
Electronic transport phenomena at high pressure and low temperature using a diamond anvil cell, N. Sakai, K. Tsuji, K. Takemura, T. Kajiwara, S. Minomura	575
Improved pressure calibration and cryogenic techniques for the diamond anvil cell, J. E. Whitmore, C. L. Bruzzone, R. Ingalls	579
Interpretation of the high pressure red shift of the ruby R_1 fluorescent line, Xu Ji-an, Zhao Min-kuang	583
Higher molecular weight materials: polymers, glass transition, liquid crystal phases	
High pressure FIR-spectroscopy on polyethylene at elevated temperature, U. Leute	588
Dielectric measurement methods in polymers under high pressure, Hoang The Giam, M. Farzaneh, Y. Abad, Bui Ai, P. Destruel	592
High pressure studies on liquid crystals, R. Shashidhar	597
Viscosities and glass transition pressures in the methanol- ethanol-water system, I. Fujishiro, G.J. Piermarini, S. Block, R.G. Munro	608
Pressure generation, measurement technique	
Non-hydrostatic stresses at low temperatures, D. B. McWhan	612
On the meaning of very high pressure measurements, F.E. Prieto, C. Renero	616

An attempt to make accurate measurements of deformations of compressible solids at high pressure and different states of stress, O. Alm, T. Olofsson	619
On a new method for measuring the coefficient of internal friction of gasket materials, M. Ogata, T. Ikezawa	623
Micellar solutions under high pressure	
Pressure dependence of micellar solubility in aqueous MyTAB solutions with added NaBr and n-Butanol, H. W. Offen, W. D. Turley	627
Micellar effects under high pressure hydrolysis reactions, Y. Taniguchi	633
Measurements of activation volumes	
Effect of pressure on competitive 1,2- and 1,4-cycloaddition reactions of p-Methoxystyrene with Tetracyanoethylene, J. Osugi, M. Nakahara, Y. Uosaki	639
Activation volumes for heterogeneous isomerization of Diethyl Maleate in several hydrocarbon solvents, Y. Ogino, S. Ozawa, H. Noguchi, G. Uchiyama	647
The interpretation of volumes of activation of photochemical reactions in solution, R. van Eldik, R. Schmidt, B. Hammerich, H.-D. Brauer, H. Kelm	651
Synthesis under high pressure	
Quantitative infrared spectroscopy at high pressures and temperatures - Investigation of the high-pressure ethylene polymerization, M. Buback	655
The chemically initiated polymerization of ethylene at high pressures and temperatures, M. Buback, H. Lendle	661
A process for preparation of amides under high pressure, M. Kurabayashi, K. Yanagiya, Y. Andoo, M. Yasumoto	668
Volumes of activation for the formation and aquation reactions of Co(III) sulfite complexes in aqueous solution, U. Spitzer, R. van Eldik	672
NMR studies under high pressure	
Pressure effect on proton/deuteron transfer reactions of 4-nitrophenylnitromethane + N,N,N',N'-tetramethylguanidine (TMG), 2,4,6-trinitrotoluene (TNT) + TMG, and TNT + 1,8-diazabicyclo-(5.4.0)undec-7-ene in some aprotic solvents, M. Sasaki, N. Sugimoto, J. Osugi	676
High pressure HRNMR: the p- and T-dependence of the hindered motions of the amide group in a series of naphthoic acid- and benzamides, J. Hauer, E.W. Lang, H.-D. Lüdemann	680
High pressure oxygen-17 NMR water exchange studies on +2 and +3 hexaaquated metal ions, Y. Ducommun, L. Helm, A. Hugi, D. Zbinden, A.E. Merbach	684

High pressure studies of minerals

High oxygen pressures: Application to fundamental and applied studies, C. Demazeau, M. Pouchard, P. Hagenmuller	688
Aggregation of nitrogen in diamond, T. Evans, Zengdu Qi	694
Adiabats of NaCl, SiO ₂ , Mg ₂ SiO ₄ , and MgO at high pressures and high temperatures and adiabatic gradient in the Earth's Mantle, R. Boehler	697
Metallic glasses and mantle minerals at high pressures studied via the Mössbauer effect, B. Bouzabata, C.L. Bruzzone, R. Ingalls	700
Raman spectra of Olivine, Albite and Analcime under pressure, B. Velde, J. M. Besson	704
Shock temperature measurement on fused quartz, H. Sugiura, K. Kondo, A. Sawaoka	707
On the electronic configuration of high oxidation states of Iron and Nickel in Perovskite type or related structures obtained under high pressure, M. Pouchard, G. Demazeau, B. Buffat, J. C. Grenier, P. Hagenmuller	711
High pressures studies of A ₂ B ₂ O ₇ (A= Na,Ca,Sr,Cd ; B= Sb(V), Bi(V),Te(VI)) pyrochlores and weberites, G. Demazeau, O. Knop	718

Geological materials

Shock-wave studies: Modeling the giant planets, M. Ross	721
The effect of confining pressure on explosive induced motion in geologic media, D. B. Larson	728
On the compression of a fine-grained porous rock at high pressures, M. Shimada, H. Yukutake	732
Mechanical properties of Mesaverde shale and sandstone at high pressure, Wunan Lin	736
Rock studies under unequal multiaxial compression, A.D. Alexeev, N.V. Nedodaev, S.B. Dubrova	740
Phase stability of Mg ₂ GeO ₄ under pressures, K. Shiota, Y. Miyamoto, H. Takubo, M. Koizumi, S. Kume	744
The thickness of the phase transition layer in the earth mantle, J. Leliwa-Kopystyński	751
Determination of the thermal diffusivity of some rocks at high pressures, U. Seipold, H. Vollstädt, W. Gutzeit	755

High pressure working

- Experimental investigations of high pressure explosive biconical system,
H. Derentowicz, L. Grygoruk, K. Jach, J. Wrobel,
Z. Ziolkowski 760
- Theoretical analysis of explosive compression of plasma in a cylindrical system,
A. Galkowski, R. Swierczynski, E. Wlodarczyk 764

Metrology and high pressure equipment

- A general-use dual-piston gage apparatus for gas pressure measurements up to 5 MPa,
G. F. Molinar, R. Maghenzani 768
- Large scale 14KB autofrettage and low cycle fatigue equipment for ordnance and industrial purposes,
D. H. Newhall 772
- Barricaded installation of a 10-liter 2 kilo-bar pressure vessel,
D. R. Boomer 786
- Steel high pressure apparatus for synthesis of superhard materials,
N.V. Novikov, A.I. Prikhna, A.I. Borimskij 790

Hydrothermal synthesis, HIP of ceramics and high pressure sintering

- Preparation of Zirkonia fine powders by the reactions between Zirconium metal and high temperature-high pressure solutions,
M. Yoshimura, S. Kikugawa, S. Somiya 793
- Hot isostatic pressing of Silican Nitride materials - A review,
H. T. Larker 797
- Influence of confined water vapour upon the H I P densification of Alumina,
R. Tegman 803
- Synthesis of Carbon with various morphologies by pressure pyrolysis of Styrene-divinylbenzene with newly-developed grayloc seal-type hydrothermal apparatus,
S. Hirano, M. Ozawa, S. Naka 807
- New high pressure process for the production of steel billets
S. I. Friborg 811

Biological systems under high pressure

- Pressure effects on biological macromolecules,
K. Heremans 815
- Bioelectrochemical studies of protein under high pressure,
M. Sato, T. Yamada, H. Karatani 821
- Pressure effect on the gelatinization of Starch,
K. Heremans J. Thevelein, J. Van Assche, S. Gerlsma 825
- Effect of Helium pressure on an active epithelium,
R. Charmasson 827

The partial specific volume of macromolecules in solution
at high pressures,
G. R. Andersson 831

The volume change on formation of a charge transfer complex
in aqueous solution and its implications for protein denaturation,
R. K. Williams 838

Light scattering measurements under high pressure,
C. J. McDonald, S. Claesson 840

MEMBERS OF THE INTERNATIONAL ADVISORY COMMITTEE

B. Baranowski (Poland), H. G. Drickamer (U.S.A.), N. M. Emanuel (U.S.S.R.), E. U. Franck (F.R.G.), S. D. Hamann (Australia), W. B. Holzapfel (F.R.G.), G. Jenner (France), W. J. le Noble (U.S.A.), J. Osugi (Japan), E. H. Ponyatowsky (U.S.S.R.), H. Ll. D. Pugh (U.K.), T. Ringwood (Australia), S. Saito (Japan), I. Sorgato (Italy), N. J. Trappeniers (The Netherlands), B. Vodar (France).

MEMBERS OF THE NATIONAL ADVISORY COMMITTEE

S. Claesson, chairman, (Uppsala), C.-M. Backman, secretary (Uppsala), G. Bäckström (Umeå), B. Enoksson (Gyttorp), T. Johannisson (Västerås), J. Kubát (Göteborg), H. Larker (Robertsfors), H. Liander (Stockholm), B. Modéer (Stockholm), K. Nilsson (Robertsfors), F. Wickman (Stockholm).

MEMBERS OF THE ORGANIZING COMMITTEE

C.-M. Backman (Uppsala), M. Ejerblad (Uppsala), H. Elmgren (Uppsala), G. Hansson (Stockholm), T. Johannisson (Västerås), L. Tegnér (Uppsala).

MEMBERS OF THE PROGRAMME COMMITTEE

C.-M. Backman (Uppsala), H. Larker (Robertsfors), R. Ross (Umeå), F. Wickman (Stockholm).

TREASURER

A. Tysklind (Stockholm).
